

Colloquium

Organic Chemistry and Biochemistry

Summer Semester 2022

Hans-Fischer Lecture Hall CH21 010

Thursday, 5:15 pm

- 12.05.2022** **Dr. Jola Pospesch**
Leibniz Institute for Catalysis (LIKAT), Rostock
Development and Application of Heteroaromatic Photoredox Catalysts
CRC 325 lecture series
- 02.06.2022** **Prof. Dr. Clemens Mayer**
University of Groningen (Netherlands)
Processing catalytic information inside bacteria
Host: Prof. Dr. Cathleen Zeymer
- 09.06.2022** **Prof. Dr. Sven Schneider**
Georg-August-Universität Göttingen
Photochemical Approaches for Dinitrogen Activation and Nitrogen Transfer
CRC 325 lecture series
- 23.06.2022** **Prof. Dr. Oliver Daumke**
Max-Delbrück-Centrum für Molekulare Medizin (MDC), Berlin
Structural insights into cristae junction formation
Host: Prof. Dr. Michael Sattler
- 30.06.2022** **Prof. Dr. Christian Becker**
University of Vienna (Austria)
New Tools for Protein Semi-Synthesis to study Posttranslational Modifications
Host: Prof. Dr. Johannes Buchner
- 07.07.2022** **Prof. Dr. Cristina Nevado**
University of Zurich (Switzerland)
Radical Photocatalyzed Cascades...with a Smile(s:-)
CRC 325 lecture series
- 14.07.2022** **Prof. Dr. Yimon Aye**
École polytechnique fédérale de Lausanne EPFL (Switzerland)
Lighting the way: how nature's reactive signals open doors to precision medicines
Host: Prof. Dr. Stephan Sieber

Organization: Golo Storch (golo.storch@tum.de)

21.07.2022

Dr. Sigrid Milles

Institut de Biologie Structurale, Université Grenoble Alpes (France)
*Analysing the conformational landscape of IDPs by integrated NMR
and single molecule FRET*

Host: Dr. Anne Schütz

28.07.2022

Prof. Dr. Thomas Boddaert

Université Paris-Saclay (France)
Photochemical Synthesis of Functionalized Cyclobutane Derivatives

Host: Prof. Dr. Thorsten Bach
