

# Colloquium

## Organic Chemistry and Biochemistry

### Winter Semester 2021/2022

Lecture Hall CH 22 210 (18.11.2021: CH 21 010)  
Thursday, 5:15 pm

- 11.11.2021**      **Prof. Paolo Melchiorre**  
ICIQ Tarragona (Spain)  
*Photochemistry and Organocatalysis - New Opportunities for Radical Processes*  
CRC 325 lecture series
- 18.11.2021**      **Prof. Cathleen Zeymer (in CH 21 010)**  
TUM  
*Design and laboratory evolution of artificial metalloenzymes and photoenzymes*
- 09.12.2021**      **Prof. Kenneth Wärnmark**  
Lund University (Sweden)  
*Is iron the new ruthenium? - From extended excited state lifetimes to efficient photofunctionality*  
CRC 325 lecture series
- 16.12.2021**      **Prof. Ute Hellmich**  
Friedrich-Schiller-University Jena  
*Wagging the dog by its tail - functional dynamics of TRP ion channel termini*  
Host: Prof. Franz Hagn
- 13.01.2022**      **Prof. Daniel Huster**  
Leipzig University  
*How small molecules influence membrane properties and why it matters*  
Host: Prof. Michael Sattler
- 20.01.2022**      **Dr. Jola Pospech**  
Leibniz Institute for Catalysis (LIKAT), Rostock  
*Development and Application of Heteroaromatic Photoredox Catalysts*  
CRC 325 lecture series
- 27.01.2022**      **Prof. Anna Hirsch**  
Helmholtz Institute for Pharmaceutical Research Saarland (HIPS)  
*Addressing underexploited anti-infective targets*  
Host: Prof. Stephan Sieber

Organization: Golo Storch (golo.storch@tum.de)
